GATE SOLUTIONS

- FENCING
- EXTERNAL WORKS

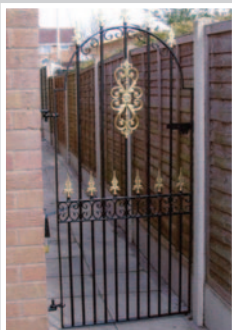

TYPES OF GATES

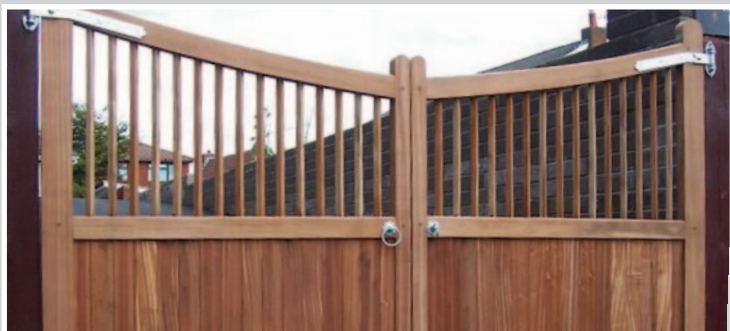

Plastic

- Environmentally friendly acrylic covered UPVC
- Virtually maintenance free, wipe clean surfaces
- 25 year + durability in a choice of 8 colours

Wrought Iron

- Versatile and stylish design options
- Galvanized steel alternatives

Wood

- Ideal for added privacy
- Selection of styles and finishes

“Our In House Design Team produce drawings, with quotations, for every gateway in order to ensure a perfect fit every time. On site surveys confirm type of gates to suit individual applications”

GATE AUTOMATION

Above Ground

- Most cost effective alternative
- Can cope with heavy weight gates
- Uses all standard accessories - remote controls, push buttons, keypads
- Fast, swing gate options

Below Ground

- Non visual, long lasting solution
- Designed to operate with metallic or wooden gates
- Uses all standard accessories
- Can be fitted to existing gateways

Sliding

- Ideal where limited entrance space
- Timed auto closure to allow pedestrian access
- Robust and reliable rack and pinion motors
- Can be used for all types of gates

Automation of any gate or door must comply with current legislation and be fitted by approved installers. RGS Construction are qualified to fit gates and power supplies to BS7671, certified to building control regulations and in accordance with all electrical and safety requirements.
